Anthropologies of Unemployment Jong Bum Kwon 2016-09-09

Anthropologies of Unemployment offers accessible, theoretically innovative, and ethnographically rich examinations of unemployment in rural and urban regions across North and South America, Europe, Africa, and Asia. The diversity of case studies demonstrates that unemployment is a pressing global phenomenon that sheds light on the uneven consequences of free-market ideologies and policies. Economic, social, and cultural marginalization is common in the lives of the unemployed, but their experience and interpretation are shaped by local and national cultural particularities. In exploring those differences, the contributors to this volume employ recent theoretical innovations and engage with some of the more salient topics in contemporary anthropology, such as globalization, migration, youth cultures, bureaucracy, class, gender, and race. Taken together, the chapters reveal that there is something new about unemployment today. It is not a temporary occurrence, but a chronic condition. In adjusting to persistent, longstanding unemployment, people and groups create new understandings of

unemployment as well as of work and employment; they improvise new forms of sociality, morality, and personhood. Ethnographic studies such as those found in Anthropologies of Unemployment are crucial if we are to understand the broader forms, meanings, and significance of pervasive economic insecurity and discover the emergence of new social and cultural possibilities.

Gender and Labour in Korea and Japan Ruth Barraclough 2009-09-10 Bringing together for the first time sexual and industrial labour as the means to understand gender, work and class in modern Japan and Korea, this book shows that a key feature of the industrialisation of these countries was the associated development of a modern sex labour industry. Tying industrial and sexual labour together, the book opens up a range of key questions: In what economy do we place the labour of the former "comfort women"? Why have sex workers not been part of the

labour movements of Korea and Japan? Why is it difficult to be "working-class" and "feminine"? What sort of labour hierarchies operate in hostess clubs? How do financial crises translate into gender crises? This book explores how sexuality is inscribed in working-class identities and traces the ways in which sexual and labour relations have shaped the cultures of contemporary Japan and Korea. It addresses important historical episodes such as the Japanese colonial industrialisation of Korea, wartime labour mobilisation, women engaged in forced sex work for the Japanese army throughout the Asian continent, and issues of ethnicity and sex in the contemporary workplace. The case studies provide specific examples of the way gender and work have operated across a variety of contexts, including Korean shipyard unions, Japanese hostess clubs, and the autobiographical literature of Korean factory girls. Overall, this book provides a compelling account of the entanglement of sexual and industrial labour throughout the twentieth century, and shows clearly how ideas about gender have contributed in fundamental ways to conceptions of class and worker identities.
